REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art does not teach a pharmaceutical composition or a steroid compound of formula I as instantly claimed.

The closest prior art is Lobaccaro et al. and Napolitano (both of record). Lobaccaro et al. teaches steroid compounds similar to those of formula 1 except that R11 is butene or ethene and that these compounds are active at the estrogen receptor. Likewise, Napolitano teaches compounds in which R11 is propynyl or ethane groups. However neither reference teaches the estrogenic compound having the group R11 that is pentene, pentane, pentyl, or a butane group substituted with a cyclopropyl group.

Applicants provided a Declaration on 8/7/2008 showing the unexpected results that the compound of presently claimed formula I containing a five-carbon chain at the 11 β position possesses properties that are different than homologs at the four-carbon chain at the 11 β position. The presently claimed compounds were shown to have both agonist activity at ER α and antagonist activity at ER β , whereas the homologs possess agonist activity at both ER α and ER β .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
